The Indian film industry is where
the Indian automobile sector
was in the early-Eighties and
the country's housing sector
was in the early-Nineties.
At an inflection point.

When your son or daughter aped a movie actor of the silver screen for fun at home, it's watched with fun. As the child grew up, a typical mom or dad always chided and dissuaded their ward saying cinema could never become a career. But, as the years passed by, people slowly began seeing its positives. No matter what their profession or economic class has been, people have patronized cinema as it is the best way of entertainment.

Nothing else can replace a motion picture.

Movie industry grew by leaps and bounds over the years. From silent movies to talkies to special effects; from black and white to colour movie to RGB; from 16mm to 35mm to 70 mm to cinemascope to i-Max and 3D to YouTube and Smartphone videos; cinema has undergone a circle of metamorphosis.

Multiple concepts, a myriad of story lines and numerous nuances like animation, short film, and cartoon also crept into the cinema as a business.

Now the big picture is unveiled. Picturehouse Media Ltd, the lone listed entity in this realm, is at its core. From movie production & financing, PML is set to become the magnifier and amplifier of the big picture it is visualizing, for it wants to be seen larger and heard louder.

From investment to shareholding, from financing to reaping dividends, from windfall to market risks, investors have got used to staying longer and stronger in the play with the Big Picture visualized by PML.

Vision

To be a game changer in the media and entertainment sector.

Mission

Deliver trendsetting solutions for capital requirements of the media and entertainment sector and create a value chain that benefits every stakeholder.

Corporate Philosophy and Identity

Picturehouse Media Limited.

South India's first and only organized film media capital provider in a country which is one of the largest producer of films in the world.

Legacy

- Picturehouse Media was acquired in 2007 by Mr Prasad V. Potluri, a serial global entrepreneur. One of the youngest first generation serial Indian entrepreneurs to have built and sold three companies the world over - Procon, Albion Orion LLC and Irevna - before he was 35.
- The earlier name of the Company was Telephoto Entertainments Ltd.
- Following a comprehensive market survey, the Company identified film production & financing as an attractive niche, marked by the absence of organized financiers. Capital provision or a simple term of financing of films was one of the few scalable initiatives in the Indian entertainment industry.

Business

- As a media capital house, Picturehouse Media finances the end-to-end process in film-making – from film ideation germination to its successful completion.

- Within just three years, the Company has evolved into a dependable one-stop-shop for film financing through PVP Capital (100 percent subsidiary) as well as film production under the banner of PVP Cinema.

Presence

- Picturehouse Media enjoys a leadership position in the financing of Tamil and Telugu cinema.
- The Company has produced and financed over 50 films since commencement of business.

Financial Highlights

Portfolio (number of films financed and produced)

Loan book (₹ crore)

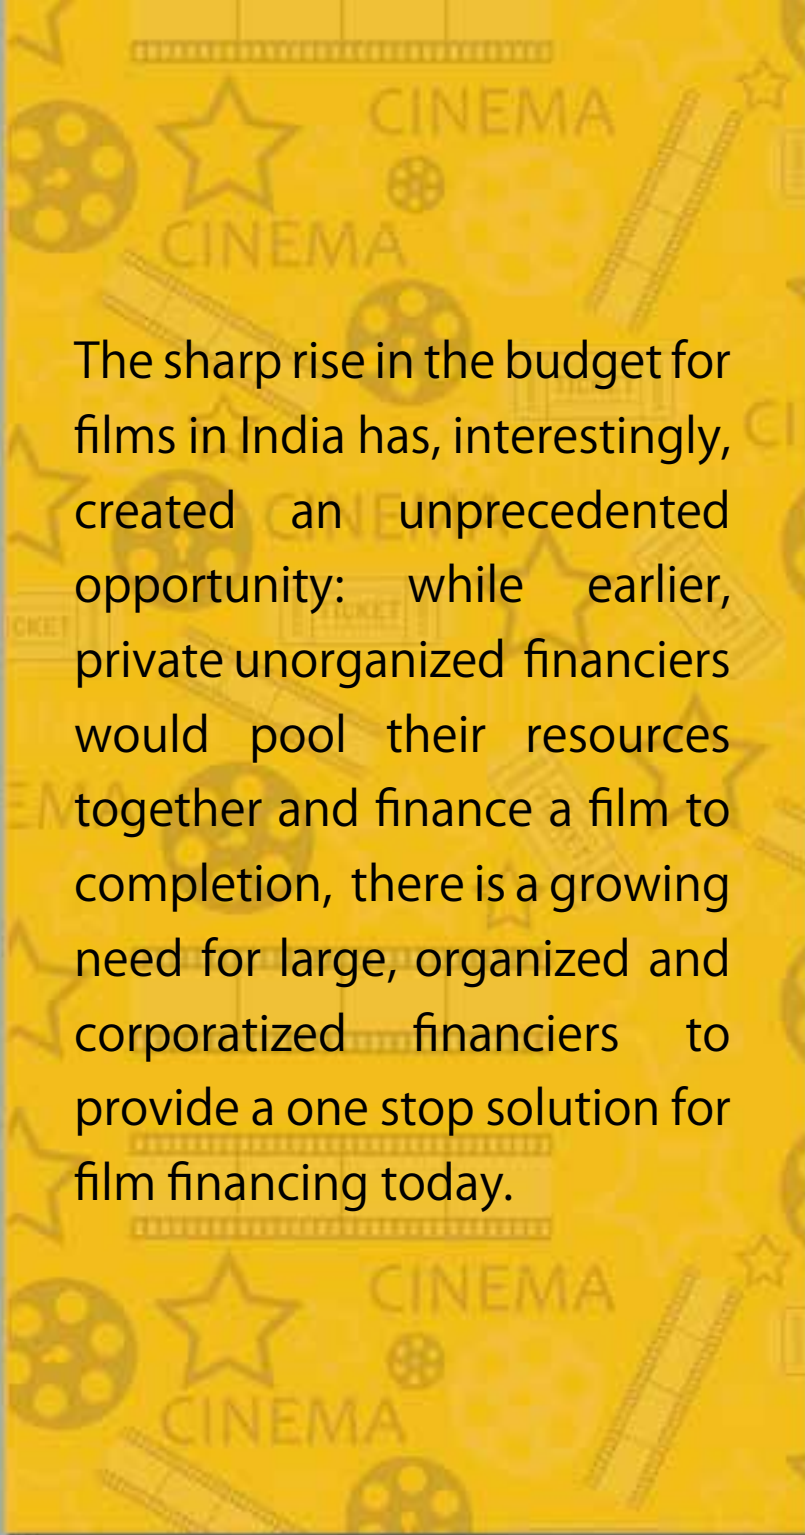

Turnover (₹ crore)

Operating Profit (₹ crore)

The sharp rise in the budget for films in India has, interestingly, created an unprecedented opportunity: while earlier, private unorganized financiers would pool their resources together and finance a film to completion, there is a growing need for large, organized and corporatized financiers to provide a one stop solution for film financing today.

Managing Director's desk

Dear Shareholder,

INDIA IS POSSIBLY THE MOST ATTRACTIVE FILM MEDIA COUNTRY IN THE WORLD.

The multi-hued spectrum of India's celluloid world is as diverse as its cultural, historical, regional and linguistic kaleidoscope. Maybe, for the rest of the world, Bollywood is the face of Indian cinema. But the regional tinsel towns like Tollywood, Kollywood and Kannada film industry are as bigger and even more new money spinners in the entertainment industry.

Indian film industry is set to grow by an estimated 11.5 percent of CAGR (compounded annual growth rate) over the next five years, hitting ₹19,300 crore (\$3.1bn) by 2017, according to a FICCI-KPMG report. The surge has a trigger-the growing middle class population, its changing aspirations and the plans by large business houses to build more multi-screen cinemas.

After tasting a success at the Bollywood, the global giants set their sight on regional markets including Marathi cinema, Tamil tinsel town, the Kollywood, and Tollywood, the Telugu filmy firmament.

Combined, these regional markets make up for more than half of the Indian film industry's revenues. Aside from being a relatively untapped market, cost of production of regional movies is not way too high usually, with some exceptions.

The size of Media & Entertainment industry in South India is estimated at ₹ 23,900 crore in FY 2013. The industry is poised to grow at a CAGR of 16 percent till FY-2017, driven by demands of its ever-discerning consumers and unstinted endeavors by media vehicles to expand their presence and operations.

While enabling regional media players to reach their target audience, the industry continues to attract national players to explore this growing South market.

India is special for an interesting reason. When it comes to the film industry, it possesses a characteristic unique, perhaps, only to itself. It brings together the magic of scale on one hand and under-penetration on the other. So, even as the country's movie industry could well be considered mature for its sheer scale - 4.4 billion cinema visits a year (highest in the world by any measure), more than 1,000 movies produced annually and 14 million Indians watching a film every day – there is a case that the sector is still fundamentally nascent because of its under-penetration.

The point that deserves a serious consideration is this: Even as India accounts for one of the largest movie markets in the world, there are only about 900 multiplex screens in the country (Source: Multiplex Association of India), which translates into a mere 10 screens per million individuals, a twelfth of the US average (Source: Business Today, May 2012). On the other hand, the number of single-screen cinemas in India has declined from 13,700 a decade ago to about 10,500 single-screens on account of the growing clout of digital cinema.

A momentum of modern infrastructure creation is driving this excitement. Until 2010, there were

around 800 multiplex screens in India; in the last three years, the number of multiplex screens in India has grown to around 1,200. Every year, India is adding around 100 multiplex screens. This pace of modern cinema-watching infrastructure growth is clearly one of the fastest in the world.

Interestingly, this attractive annual increment has a dramatic impact on the economics of the overall Indian film industry.

This has a remarkable downstream impact as an increasing number of movies are being made craftily around a superior audio-visual experience compatible with the modern film-viewing infrastructure being created. This has translated into higher ticket prices and footfalls. This obviously increased the income into the hands of infrastructure owners. Thus, it has extended to higher distributor collections, higher producer revenues and higher incomes for actors, performers and technicians across the board.

In short, this single reality – modern film watching infrastructure - has led the Indian movie industry in the short span of a decade stride more rapidly than all the other industry changes put together in the earlier nine decades.

In turn, this development has had a significant impact on the cost of film-making.

Movie-making budgets – across languages and regions – have risen substantially over the last decade to around USD 2-3 million (translating into around ₹15 crore to ₹20 crore on an average). A film was once considered expensive, if it was made at a cost of ₹10 crore. The most expensive movie made in India today costs ₹100 crore and most films fall in the ₹25 Cr - ₹50 Crore bracket.

The steep rise in the budgets for films in India has, interestingly, created an unprecedented opportunity. While private and unorganized financiers were pooling up their resources together to finance a film until its completion till recently, there is a growing need for large,

organized and corporatized financiers to provide stable film financing today.

Picturehouse Media is the right company in the right sector at the right time.

The Company is one of the listed media capital providers in South India and among a handful in the genre of organized film financing in the country.

What makes the Company special is that even as many companies may even be considering an entry in this challenging sector, Picturehouse Media has already demonstrated an extensive track record in having financed more than 50 films since commencement of business.

More than just financing films, Picturehouse Media has already demonstrated a capability in production and build a strong brand recall for the organisation amongst film-goers.

We believe that the vernacular cinema has always been the leader for the last 100 years and will remain so for another century to come. Entertainment industry in the South takes 40 percent of the chunk of the cake and that is where we have evolved as absolute leaders who have not only brought great amount of discipline to the Industry but also Institutional Practices, and Scalability. And, people have recognized and appreciated our brand.

Today PML is a household name within the fraternity and the public as well and those are the realms where we carved a niche for ourselves in the last three years and, intend to scale it up in the next five to seven years.

The journey of next five years will be towards monetizing our brand and goodwill in the South Indian market place. We will be comfortable navigating and operating this space which is good enough for us to build and scale up in the next 10 years.

We have created intangibles so far; tangibles will happen in the next three to five years. The goal is to be the top most producer of feature films in Telugu, Tamil, Kannada and Bollywood, because none of the producers from North India has been successful down South. The first step in this direction is our film "Bangalore Days" in Kannada.

With the costs involved in film production spiraling continuously, the scope and opportunity for individual producers is declining. It is high time that institutional investors pitched in and that is what we have realized three years ago. Today, we are one of the pioneers who institutionalized film production.

Very best regards to you all.

Prasad V. Potluri
Managing Director

The journey of next five years will be towards monetizing our brand and goodwill in the South Indian market place. We will be comfortable navigating and operating this space which is good enough for us to build and scale up in the next 10 years.

The very stepping in of Picturehouse Media Ltd into the filmy firmament has set in an orientation, the way business is done. It is now passing through a process and we are proud to have pioneered the concept.

The largely unorganized business has been shown the way on how to channelize it and PML is the flag-bearer in this specialized business.

It's not just the various steps in movie making, even its business needs professionalism. We have brought in the same into the industry. And, it is here to stay. From storyline to screening, every step is subjected to a thorough anticipation audit, SWOT analysis and expert opinion.

Emotional quotient of the producer and the movie goer, tastes, glamour, craze, picturization,

taking, editing, mood, theme, protocol, etiquette, dialogue, music, screenplay, are all taken into consideration before embarking upon a project.

This professional discipline empowers managers to scale up the business across a wide spectrum of banners and languages, as it is constantly scrutinized, audited and updated.

Today PML is a household name within the fraternity and the public as well and those are the realms where we carved a niche for ourselves in the last three years and, intend to scale it up in the next five to seven years.

Without risk, there is no reward. So goes the saying. But, Picturehouse Media Ltd largely devised a formula that de-risks the film financing business. Thereby, it has bolstered the investor confidence in the company. This obviously minimized or at times nullified the non-performing assets.

If the investor loses money due to the market risks, it happens with his consent. But if the investment goes down the drain due to lack of professional way of handling the business, it is called travesty of justice.

De-risking may not be a complete insulation. But the financial structure engineered into the system provides organic growth to the company from its internal accruals and captive resources resulting in attractive dividends. The corpus thus created would naturally become a resource for achieving an accelerated growth of the company.

Picturehouse Media Ltd believes in strong fundamentals. The operational discipline infused into its management of film financing largely leverages its investment in direct access and market intelligence of the end-to-end process of film production and its release. This enables the company to deploy funds on a timely basis.

The film's master copy/negatives are the instruments against which a lien is secured towards collateral which will be enlarged only after all the loans are cleared.

PML has the necessary bandwidth to operate on all fronts to complete the production, recover dues and provide a healthy operation keeping the investor interests in view, even in the event of a producer fails to fulfill all the commitments.

The revenues are not subject to market vagaries, thanks to its meticulous effort to keep the NPAs at zero. This is indeed a remarkable feat scripted by PML.

We have created intangibles so far; tangibles will happen in the next three to five years.

The goal is to be the top most Capital provider & Content creator in Telugu, Tamil, Kannada and Bollywood, because none of the producers from North India has been successful down South.

We believe that the vernacular cinema has always been the leader for the last 100 years and will remain so for another century to come. Entertainment industry in the South takes 40 percent of the chunk of the cake and that is where we have evolved as absolute leaders who have brought not only great amount of discipline to the Industry but also Institutional Practices, and Scalability. And, people have recognized and appreciated our brand.

With the costs involved in film production spiraling continuously, the scope and opportunity for individual producers is declining. It is high time that institutional investors pitched in and that is what we have realized three years ago. Today, we are one of the pioneers who institutionalized film production.

The company's focus on Internal Revenue Return (IRR) balancing yielded excellent results and put the company on a good stead in terms of ensuring the safety of principal and also sustainable return higher than the existing cost of capital.

Our business model

Ten things that our shareholders need to know about how we have emerged as one of the most exciting media capital providers in the South Indian film industry.

Objective

Our core purpose is to be an attractively profitable company with industry-leading IRRs.

Niche

The Company has selected to be present in the Tamil Nadu, Telangana, Andhra Pradesh, Karnataka and Kerala film financing segments.

Structured capital deployment

The Company works only with AAA-rated producers who in turn work with top-rated artistes and technicians.

Capital

The Company finances prospective films using low-cost accruals. A growing net worth has helped grow the Company's business.

Discipline

The Company's structured three-tier verification and documentation process appraises a producer's creditworthiness, project viability, security collateral and the quantum of funds release. All funding proposals are appraised as projects, which are carefully analyzed by a credit committee headed by the Managing Director. The result is a willingness to finance one of an average 10 film proposals.

Robust intellectual capital

The senior management is passionate about the business with an appraisal of over 1,000 films across various genres. The Company possesses a team of experienced professionals who possess in-depth knowledge and experience in project financing coupled with vast experience in the film industry.

NPAs

The Company's robust film appraisal and financing/producing capabilities are validated through zero non-performing assets following more than 50 films being financed in the last three years.

Exposure

The Company finances only 60-65 percent of the total film budget; the rest is mobilized by the producer to ensure continued commitment.

Collateral

The Company charges a lien on the film negatives/digital media, which is released only after its dues have been completely liquidated. In instances, the Company also charges land banks/other assets as security collateral to secure its lending.

Extension

The Company extended to film production to strengthen the quality of its brand, ensure a stronger market understanding and diversify income streams.

The Company has produced blockbuster films like Naan E (in Tamil) and Balupu (in Telugu).

Managing risks

Industry risks

The Indian media and entertainment industry may cease to grow.

Mitigation

The Indian media and entertainment industry has outperformed the Indian economy with one of the fastest growing sectors in the country today. As a growing population pool has access to larger disposable incomes, the industry has grown faster. A KPMG-FICCI Frames 2012 report states that the Indian media and entertainment industry registered a 12 percent growth over 2010 to reach ₹728 billion. This growth trajectory was backed by strong consumption in Tier II and III cities, continued growth of regional media, and a fast increasing new media business. Overall, these trends are expected to push the industry to register a CAGR of 15 percent to an estimated ₹1,457 billion by 2016. Moreover, the same report states that the Indian film industry is projected to grow at a CAGR of 10.1 percent to touch ₹150 billion by 2016 from its size of ₹93 billion in 2011 indicating a growth of 11.5 percent vis-à-vis 2010.

Competition risks

The competitive Indian film financing industry may trend towards thinning margins.

Mitigation

Picturehouse Media is the largest and only listed player in the South Indian film financing space. By virtue of its sheer scale, the Company has embraced the larger vision of organizing the industry, typically characterized by unorganized moneylenders. The Company has carved out a unique space for itself; the Company is a selective financier with a rejection rate of 90 percent.

Perception risks

The Indian film financing and production industry is considered to be a high risk proposition.

Mitigation

The film financing and production industry is fraught with risks. However, the business becomes attractive for players like Picturehouse Media who operate in the organized space, backed with 100 percent compliance with processes with a view to remove arbitrariness in decision-making.

The Company finances films following a comprehensive study of creditworthiness and track record of film producers/directors/actors/technicians. The Company has selected to work only with AAA-rated producers and prominent artistes and technicians. Moreover, the Company's role as a financier is independent of the commercial performance of the film as it recovers its outstandings well before film release.

Project completion risks

The film project might be delayed or might not be completed at all, impacting the portfolio adversely.

Mitigation

The Company monitors film progress. In certain cases, it checks with film processing labs/digital film storage companies to refer to the quantum of film shot on reel besides deputing staff to periodically visit studios and other on-site locations to ascertain shooting progress. Based on this understanding, it releases milestone funds or undertakes course corrections. In the rare event of a film not likely to be completed, the Company assumes the role of a producer (as was the case in the film Rajapattai, which was successfully released and funds recovered). The Company intends to leverage this experience and produce around five films in 2013-14.

Collateral risks

The Company's loan book might be exposed to losses in the event of the film being postponed or shelved.

Mitigation

The Company charges a lien on the film negatives/ digital media and even land bank and other assets in extreme cases to cover its loans. Besides, it issues NOCs for film release only once all the outstandings are paid by the producer. A strong recovery system backed by robust loan collaterals has resulted in the Company reporting zero NPAs on its books over the last three years with a track record of financing/producing over 50 films during this period.

Piracy risks

Piracy might dampen the prospects for legitimate revenue generation.

Mitigation

The Company is independent of this risk as it closes its entire lending transaction before the film is released.

Financing risks

The Company may not be able to mobilize funds for onward deployment.

Mitigation

In fact, the Company mostly depends on internal sources and to an extent on external agencies to generate funds for deployment into film financing.

Capital deployment risks

The Company might not be able to get the right opportunity to deploy funds.

Mitigation

On an average, the Company refuses to finance nine out of the 10 films that come its way, reflecting the high quality of its loan book of ₹118.65 crore (2012-13). On an average, the Company keeps a pipeline of around 10 films at all times with a view to ensure limited idling of deployable capital, which is otherwise put into liquid assets.

Review of Operations

The year under report is a mixed year for the Company. While PVP Capital Limited, Wholly Owned Subsidiary of the Company had performed exceptionally well during the year by registering a revenue from operations of Rs.1953 lakhs as against Rs.683 lakhs during the previous year and also by registering a net profit of Rs.671 lakhs as against Rs.293 lakhs during the previous year. However, the Parent Company i.e., Picturehouse Media Limited could not do well, mainly because of the reason that the bi-lingual movie produced by it, i.e., Irاندam Ulagam ('Varna' in telugu), could not attract the audience and severely impacted the bottom-line of the Company. Because of this reason, though there is a two fold increase in the consolidated total income, the profit was not in proportion to the turnover.

On consolidated basis, total income for the financial year 2013-14 at Rs.10141.99 lakhs was higher by 101.29% over last year (Rs.5038.39 lakhs in 2012-13). Earnings before interest, tax, depreciation and amortization (EBITDA) at Rs.3207.77 lakhs was higher by 9.54% over last year (Rs.2928.34 lakhs in 2012-13). Profit after tax (PAT) at Rs. 1079.22 lakhs was higher by 1.62% over last year (Rs.1061.92 lakhs in 2012-13). On standalone basis, revenue from operations for the financial year 2013-14 at Rs. 7933.24 lakhs was higher by 82.17% over last year (Rs.4354.87 lakhs in 2012-13). EBITDA at Rs. 1533.61 lakhs was lower by 35% over last year (Rs. 2358.20 lakhs in 2012-13). PAT at Rs. 405.42 lakhs was lower by 47.28% over last year (Rs. 769.03 lakhs in 2012-13).

After the result of "Irاندam Ulagam", the Management of the Company, after a thorough introspection, has decided to "go slow" in movie production and as a result the Company has rolled out only one film after Irاندam Ulagam ('Varna' in telugu) viz., Vallavukku Pullam Ayudham (co-produced with Hand Made Films) which is remake of successful Telugu Movie 'Maryada Ramanna', which has yielded moderate profits. Irrespective of the success or failure, one positive issue that has happened during the year was that the Company could able to get a very good brand image for its banner "PVP Cinema". During the current financial year, the Company would be making a multi starrer movie with Akkineni Nagarjuna and Nandamuri Taraka Rama Rao (popularly known as "Jr. NTR")

in the lead roles and the story discussions and movie planning are in progress. Apart from this direct movie, the Company is planning to buy remake rights of some super hit movies in other regional languages.

Dividend

In order to conserve the resources for future plan of actions and also to reduce the dependence on outside lenders, the Board of Directors did not recommend any dividend for the financial year 2013-14.

Capital Structure

During the year, there is no change in the capital structure of the Company.

**MANAGEMENT'S DISCUSSION
& ANALYSIS**

Industry Structure & Development:

In the recent past, the Indian economy has had to overcome varied challenges in its resolve to sustain its economic success. The major challenges included: unsupportive external environment, domestic structural constraints, growth slowdown and inflationary pressures. The Central Statistics Office (CSO's) estimates indicate a 4.9 percent growth in real GDP in 2013-14, as compared to a growth of 4.5 percent posted in 2012-13, marking a second straight year of below 5 per cent growth. The country witnessed a landmark election verdict and expectations are huge from the newly elected government to revive the economy.

As per the FICCI-KPMG Report on Media & Entertainment (M&E) industry, 2014, this industry had witnessed a growth of 11.8% during the year 2013, from INR 821 billion during the FY 2012 to INR 918 billion in the FY 2013. In the same period the film industry grew at 11.5% from INR 112.4 billion to INR 125.3 billion. Further, it is also estimated that due to the factors like digitization, growth of regional media, fast increasing new media business, M&E industry is estimated to achieve a growth rate of 13.18% in 2014 to touch INR 1039 billions. Going forward, this sector is projected to grow at a healthy CAGR of 14.2% to reach INR 1786 billion by 2018. It is expected that during the same period film industry will reach INR 219.8 billion at a CAGR of 11.9%.

The Indian Film Industry has been one of the oldest segments of the Indian entertainment industry. The Lumiere Brothers brought motion pictures to India in 1896, and since then there has been no looking back. The year 2013 was a landmark year for Indian cinema as it completed its 100 years. Today, India has the world's biggest movie industry that churns out around one thousand movies each year. The Indian Film Industry is witnessing remarkable improvements on all spheres - from the technology used in making and distributing films to the themes of the movies, exhibition, finance and marketing and even in its business environment. There is no doubt that the Indian Film Industry is finally getting corporatized in that sense. Indian Film Producers are also looking overseas for co-production. The future looks immensely bright with a number of theatres poised to go digital. Professionally-run production houses are competing with the family-run banners to bring in greater sophistication and efficiency across the value chain. In some cases they are even learning to operate cohesively and leveraging on each other's strength. The approach has shifted from producing pure star driven films to experimenting with content and providing a platform to newer talent. Although production and print and advertising costs have escalated by 15-20 percent in 2013, corporatisation is leading the industry to become more prudent in producing movies. The pre- production phase of movies has become more structured with greater emphasis given to acquisition of script, planning, budgeting and financing activities. While the cost structure varies based on the budget and star cast, artist fees continue to form a major component of film's budget for most large productions. Further, the growing middle class with higher disposable income has become the strength of the Media and Entertainment (M&E) industry.

On the other side, the M&E industry in India is highly fragmented and lack of cohesive production & distribution infrastructure and lack of efforts for media penetration in lower socio-economic classes are some of the bottlenecks that the Industry is facing. While the capital poured in through organised and unorganised channels, the industry still faced challenges in delivering robust bottom line results. Films had slower growth in 2013, than in 2012 and returned to the mean as far as growth rates go. Multiplex expansion, ticket prices growth and the expansion of digital screens are all likely to slow down in the near term – challenging the industry to find new avenues to maintain momentum. However, India is a heavily under-screened country and the macro story for the film industry remains strong.

Opportunities & Threats:

Concept of crossover movies, emergence of new distribution channels, improved internet access at affordable prices, rapid de-regulation, rise in ancillary revenue streams, rise in viewership and technological innovations like animations, etc. are some of the opportunities that the Industry may foresee in the times to come. Once the Industry is able to tap the opportunities, there will not be any looking back for the Indian M&E Industry.

Sourcing of film financing has been largely unorganized due to high risk nature of the business. However, with scaling up of revenues, Indian films are increasingly attracting private equity / venture capital funding from institutions directly. This indicates the growth of organized film financing for the film industry, and is expected to sustain and grow in the years ahead.

On the other hand, this Industry is facing threats like Piracy, lack of quality content, muted GDP growth and insufficient number of big corporate houses in Production, Distribution and Financing for the Movies and lack of transparent data. India is one of the top countries witnessing peer-to-peer file sharing infringement worldwide. Large foreign studios or investors indicate that they are reluctant to invest in the Indian film industry because there is no way of verifying or validating the data made available in the public domain about the amount a film has grossed and its profitability.

Financial Performance:

- A. **Capital Structure:** There is no change in the capital structure during the period under report
- B. **Reserves & Surplus:** The increase in Reserves & Surplus has been contributed by the profit for the year under report.
- C. **Borrowings:** The Long term and short term Borrowings as at the end of the financial year 2014 stood at Rs.108.65 crore as against Rs.109.16 crore in 2013.
- D. **Fixed Assets:** There is no significant increase in the fixed assets of the company.
- E. **Non-current Investment:** It is the amount invested by the Company in its wholly owned subsidiaries PVP Capital Limited, PVP Cinema Ltd and Picturehouse Media Private Limited(overseas subsidiary based in Singapore incorporated during the 2013-14).
- F. **Long Term and Short Term loans & advances:** This indicates various loans and advances made by the company towards film production and film financing as part of its business operations.
- G. **Inventories:** Inventory at the year end consists of film production work in progress (WIP).
- H. **Revenue from Operations:** The consolidated revenue increased to Rs.101.24 crore from Rs.50.24 crore during the previous year, the increase is predominantly supported by production of Films by the company.
- I. **Movie production expenses:** The movie production expenses for the year 2014 stood at Rs.59.38 Cr, which represents the expenses incurred on production of movies by the company and released during the year.
- J. **Employee cost:** The increase in employee cost was due to recruitment of talented executives in the senior cadre of the Company.
- K. **Net Profit:** The consolidated net profit for the year was Rs.10.79 crore and has registered a marginal growth when compared to the consolidated net profit generated during the previous year.

Outlook:

There is a steady rise in the dynamism and confidence in India's film sector. Increasing consumption in tier II & III cities, growing importance of regional markets, greater focus on market research, innovation in content and evolution of marketing and delivery platforms to serve different niches – all point towards a very positive future for the Indian film industry.

Risks & Concerns:

In the talent driven M&E Industry, the ability to attract and retain right people has always been a concern for most of the Companies operating in this Industry.

The issue of piracy remains a critical issue for the Indian film industry. However, there are some changes that have helped the industry battle this issue aggressively. A few years ago, a film reached television and home video only after six months of its theatrical release. Pirates could take advantage of this delay, and would flood the market with pirated DVDs/VCDs. Currently the theatre-to-television window has been reduced to less than 3 months. Further steps being taken are- proposed new Cinematograph Act, 2013 tough stance by certain producers to release the movie only on digital screens and various initiatives to raise consumer awareness. According to Motion Pictures Distributors Association (MPDA) India is the fourth largest downloader of films after the US, Great Britain and Canada. It estimates the loss due to piracy in 2012 was USD 1.1 billion, an increase of 15.79 percent from that in 2008. In this context, it is important that industries collaborate and create efficient mechanisms for content protection. With cooperation from the government and internet service providers, site-blocking measures can combat online piracy.

While India leads world averages in terms of the number of films produced each year and attendance, the under penetration of theatre screens in India remains the biggest challenge for the industry. There are just 8 screens per million people, unlike in the United States, where there are 117 per million. Besides, unlike other countries such as US, U.K. and China, India's merchandizing market is still very premature.

High entertainment tax acts as a major impediment to the growth of M&E industry, as the overall tax implication is as high as 40-50 percent in states like Maharashtra, Uttar Pradesh, Bihar and Karnataka. Such high rates of entertainment tax on box office admissions seem irrational considering that films are available on other platforms like television and Internet platforms for free or very little cost. Such regulations have also led to many corrupt trade practices. Separately, it will be useful to provide tax holiday benefits for infrastructural development on setting up Cineplexes in tier II and tier III cities to incentivize the sector and boost growth and development of such cities.

Ticket pricing in many states is regulated by state governments. The industry expects the governments to relax regulations on fixed number of shows and cap on ticket pricing and let the exhibitors decide on the admission rates according to demand. Flexible pricing will also help to reduce black-marketing of tickets since theatre owners will have freedom to revise the rates according to the audience inflow.

Internal Control System and their adequacy:

The internal audit and other internal checks implemented in the Company are adequate and commensurate with the size and nature of operations providing sufficient assurance and safe guarding all assets, authorizing transactions and its recording and timely reporting.

Human Resources & Industrial Relations:

Industrial relations are harmonious. The company recognizes the importance and contribution of the human resources for its growth and development.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with the ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatements.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosure in the financial statements. These procedures selected depend on the auditor's judgment, including the assessment of the risk of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessment, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by the management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for audit opinion.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India:

NOTES FORMING PART OF THE STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2014

Note 1: Significant Accounting Policies

1.1 Basis of preparation of financial statements

- A. The financial statements of the Company have been prepared under the historical cost convention in accordance with the Accounting Standards specified by Companies (Accounting Standards) Rules, 2006 issued by the Central Government and the relevant provisions of the Companies Act, 1956, to the extent applicable.
- B. All financial transactions have been recognized on accrual basis. The preparation of financial statements in conformity with the GAAP requires that the management makes estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent liabilities as at the date of the financial statements and the reported amounts of revenue and expenses during the reported period. The Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Future results could differ from those estimates.

1.2 Revenue Recognition

Income from movie and related rights are recognised in accordance with the terms of the agreements on accrual basis. Interest income is recognized on time proportionate basis. Income earned on licensing the copyrights is recognized on time proportionate basis.

1.3 Use of Estimates

In preparation of financial statements conforming to GAAP requirements certain estimates and assumptions are essentially required to be made with respect to items such as provision for doubtful debts, future obligations under employee retirement benefit plans, income taxes and the useful life period of Fixed Assets. Due care and diligence have been exercised by the Management in arriving at such estimates and assumptions since they may directly affect the reported amounts of income and expenses during the year as well as the balances of Assets and Liabilities including those which are contingent in nature as at the date of reporting of the financial statements.

To comply with GAAP requirements relating to impairment of assets, if any, the Management periodically determines such impairment using external and internal resources for such assessment. Loss, if any, arising out of such impairment is expensed as stipulated under the GAAP requirements. Contingencies are recorded when a liability is likely to be incurred and the amount can be reasonably estimated. To this extent the results may differ from such estimates

1.4 Fixed Assets and Depreciation

Fixed Assets are stated at acquisition cost. Depreciation is charged on a pro-rata basis on a straight-line method as per the rates and in the manner prescribed under the schedule XIV to the Companies Act, 1956, as amended.

1.5 Benefits to employees

Gratuity

The liability as at the Balance Sheet date is provided for based on the actuarial valuation carried out in accordance with Accounting Standard 15 (Revised 2005) on "Employee Benefits" as at the end of the period. Actuarial Gains/Losses are recognized immediately in Statement of Profit & Loss.

Leave Encashment

Leave encashment is paid for in accordance with the rules of the Company and provided based on an actuarial valuation as at the balance sheet date. Actuarial Gains/Losses are recognized immediately in Statement of Profit & Loss.

Other Benefit Plans

Contributions paid under defined contribution plans are recognized in the Statement of Profit and Loss in each year. Contribution plans primarily consist of Provident Fund administered and managed by the Government of India. The company makes monthly contributions and has no further obligations under the plan beyond its contributions.

1.6 Investments

Long-term investments are stated at cost, less diminution other than temporary in the value of such investments, if any. Current investments are valued at cost or market value whichever is lower.

1.7 Inventory

Inventory at the yearend consists of film production Work in progress (WIP). The inventory WIP are valued at cost or net realizable value whichever is less. Cost includes direct and indirect cost relating to film production activity.

1.8 Foreign Currency Transactions

All foreign currency transactions are accounted for at the rates prevailing on the dates of the transaction. Foreign currency assets and liabilities are converted at the yearend rates as applicable. The exchange difference on settlement / conversion is adjusted to Statement of Profit and Loss.

1.9 Taxes on Income

Tax expense comprises current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the relevant tax laws. Deferred income taxes reflect the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. In situations where the company has unabsorbed depreciation or carry forward tax losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that such deferred tax assets can be realised against future taxable profits.

1.10 Leases

The assets purchased under hire purchase agreements are included in the Fixed Assets block. The value of the asset purchased is capitalized in the books. A liability for the same amount is created at the time of entering into the agreement. The payments are made to the HP vendors as per the EMI's given in the hire purchase agreements. The finance charges are debited to the statement of profit and loss and the principal amount is adjusted against the liability created for the vendor.

Lease rentals in respect of operating lease arrangements are charged to expense on a straight-line basis over the term of the related lease agreement.

1.11 Borrowing Cost

Expenditure on borrowing cost on the loans obtained specifically for acquisition, construction or production of qualifying assets are capitalized as part of the cost of that asset. Other borrowing costs are charged to revenue over the tenure of the loan.

1.12 Impairment of Assets

The Company reviews the carrying values of tangible and intangible assets for any possible impairment at each Balance Sheet date. Impairment loss, if any, is recognized in the year in which the impairment takes place.

1.13 Cash Flow Statement

Cash flow statement is prepared under the indirect method as per Accounting Standard 3 "Cash Flow Statements".

1.14 Segment Reporting

The Company operates in only one segment viz. movie and related activities. Hence segment reporting is not applicable.

1.15 Earnings per Share

The earnings considered for ascertaining the Company's Earnings Per Share comprises the net profit after tax. The number of shares used in computing Basic EPS is the weighted average number of shares outstanding during the period. The number of shares used in computing diluted EPS comprises the weighted average shares considered for deriving basic EPS, and also the weighted average number of equity shares that would be issued on the conversion of all dilutive potential equity shares.

1.16 Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognized when the Company has an obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Obligations are assessed on an ongoing basis and only those having a largely probable outflow of resources are provided for.

Contingent Liabilities are recognized only when there is a possible obligation arising from past events due to occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or where any present obligation cannot be measured in terms of future outflow of resources or where a reliable estimate of the obligation cannot be made.

NOTE 25: OTHER ITEMS

25.1 Provision for Taxation and deferred tax

The provision for deferred tax asset/liability has been made in accordance with AS-22 on Accounting for Taxes on Income.

CONSOLIDATED FINANCIAL SECTION

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors of Picturehouse Media Limited, Chennai

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated financial statements of Picturehouse Media Limited (the Company), and its subsidiaries, which comprises the Balance Sheet as at March, 31 2014 and the consolidated Statement of Profit and Loss and the consolidated Cash Flow Statement for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation of these consolidated financial statements that give a true and fair view of the consolidated financial position, consolidated financial performance and consolidated cash flows of the Company in accordance with the accounting principles generally accepted in India. This includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the consolidated financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with the ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatements.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosure in the consolidated financial statements. These procedures selected depend on the auditor's judgment, including the assessment of the risk of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessment, the auditor considers internal control relevant to the Company's preparation and fair presentation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by the management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for audit opinion.

Opinion

In our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the reports of the other auditors on the financial statements of the subsidiaries as noted below the consolidated financial statements give a true and fair view in conformity with the accounting principles generally accepted in India:

- a) In the case of the consolidated Balance Sheet, of the State of Affairs of Picturehouse Media Limited and its subsidiaries as on March 31, 2014;
- b) In the case of consolidated Statement of Profit and Loss, of the PROFIT for the year ended on that date; and
- c) In the case of consolidated Cash Flow Statement, of the Cash Flows for the year ended on that date

Emphasis of Matter

We draw attention to (a) Note 1.1.E with regard to preparation of financials of the subsidiary company on going concern, and (b) Note 24.10 with regard to the demands of Income Tax, which describes the uncertainty related to the outcome of the Appeals filed against the Orders of the Authorities. Our opinion is not qualified in respect of these matters.

Other Matter

We did not audit the financial statements of a subsidiary, whose financial statements reflect total assets (net) of Rs.13096.31 lakhs as at March 31, 2014, total revenues of Rs.2208.75 lakhs and net cash inflows amounting to Rs.6.71 lakhs for the year then ended. These financial statements have been audited by other auditors whose reports have been furnished to us by the Management, and our opinion is based solely on the reports of the other auditors. Our opinion is not qualified in respect of this matter.

NOTES FORMING PART OF THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2014

Note 1: Significant Accounting Policies

1.1 Basis of preparation of financial statements

- (A) The financial statements of the Group have been prepared under the historical cost convention in accordance with the Accounting standards specified by Companies (Accounting Standards) Rules, 2006 issued by the Central Government and the relevant provisions of the Companies Act, 1956, to the extent applicable.
- (B) All financial transactions have been recognized on accrual basis. The preparation of financial statements in conformity with the GAAP requires that the management makes estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent liabilities as at the date of the financial statements and the reported amounts of revenue and expenses during the reported period. The actual results could differ from those estimates. Examples of such estimates include future obligations under employee retirement benefit plans and the useful life of the fixed assets.
- (C) Principles of Consolidation: The Group's consolidated financial statements include those of Picturehouse Media Limited (formerly Telephoto Entertainments Limited), PVP Cinema Private Limited (Formerly PVP Screens Private Limited), PVP Capital Ltd (Formerly Nahar Finance Ltd), Picturehouse Media Privated Limited, Singapore its 100% Subsidiary. All significant inter-company transactions and balances have been eliminated in the consolidated statements.
- (D) List of subsidiaries and proportion of voting power held:

Name of Subsidiary	Country of incorporation/ Residence	Proportion of Ownership interest / Proportion of Voting power held
PVP Cinema Private Limited (Formerly PVP Screens Private Limited)	India	100 % (Wholly owned Subsidiary)
PVP Capital Ltd (Formerly Nahar Finance Ltd)	India	100 % (Wholly owned Subsidiary)
Picturehouse Media Private Limited	Singapore	100% (Wholly owned Subsidiary)

- (E) Going Concern: During the previous year, PVP Cinema Private Limited is fully dependent upon the financial and administrative support of its holding company Picturehouse Media Limited (formerly Telephoto Entertainments Limited). Hence, the financial statements are prepared on going concern basis.

1.2 Revenue Recognition

Income from Movie and related rights are recognized in accordance with the terms of the agreement on accrual basis. Sale of Intangibles are recognized when asset are sold to customers which generally coincides with the delivery and acceptance. Income earned on licensing the copyrights is recognized on time proportionate basis. Interest income is recognized on time proportionate basis. Where loans have been classified as non-performing assets the interest is recognized on collection basis as per RBI guidelines.

1.3 Use of Estimates

In preparation of financial statements conforming to GAAP requirements certain estimates and assumptions are essentially required to be made with respect to items such as provision for doubtful debts, future obligations under employee retirement benefit plans, income taxes and the useful life period of fixed

assets. Due care and diligence have been exercised by the Management in arriving at such estimates and assumptions since they may directly affect the reported amounts of income and expenses during the year as well as the balances of Assets and Liabilities including those which are contingent in nature as at the date of reporting of the financial statements.

To comply with GAAP requirements relating to impairment of assets, if any, the Management periodically determines such impairment using external and internal resources for such assessment. Loss, if any, arising out of such impairment is expensed as stipulated under the GAAP requirements. Contingencies are recorded when a liability is likely to be incurred and the amount can be reasonably estimated. To this extent the results may differ from such estimates.

1.4 Fixed Assets and Depreciation

Fixed Assets are stated at acquisition cost. Depreciation is charged on a pro-rata basis on a straight-line method as per the rates and in the manner prescribed under the Schedule XIV to the Companies Act, 1956, as amended. Expenditure on maintenance, repairs and renewals of minor items are generally charged to revenue as incurred. Upon sale or write off of assets, the cost of the assets and the accumulated depreciation on such assets are eliminated from the Fixed Assets block. The profit / loss on sale of assets are included in the Statement of Profit and Loss.

1.5 Inventory

Inventory at the yearend consists of film production Work in progress (WIP). The inventory WIP are valued at cost or net realizable value whichever is less. Cost includes direct and indirect cost relating to film production activity.

1.6 Benefits to employees

Gratuity

The liability as at the Balance Sheet date is provided for based on the actuarial valuation carried out in accordance with revised Accounting Standard 15 (Revised 2005) on "Employee Benefits" as at the end of the period. Actuarial Gains/Losses are recognized immediately in Profit & Loss Account.

Leave Encashment

Leave encashment is paid for in accordance with the rules of the Group and provided based on an actuarial valuation as at the balance sheet date. Actuarial Gains/Losses are recognized immediately in Profit & Loss Account.

Other Benefit Plans

Contributions paid/ payable under defined contribution plans are recognized in the Profit and Loss Account in each year. Contribution plans primarily consist of Provident Fund administered and managed by the Government of India. The Group makes monthly contributions and has no further obligations under the plan beyond its contributions.

1.7 Foreign Currency Transactions

All foreign currency transactions are accounted for at the rates prevailing on the dates of the transaction. Foreign currency assets and liabilities are converted at the yearend rates as applicable. The exchange difference on settlement / conversion is adjusted to statement of Profit and Loss.

1.8 Taxes

Tax expense comprises current and deferred. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the relevant tax laws. Deferred income taxes reflect the

impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. In situations where the company has unabsorbed depreciation or carry forward tax losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that such deferred tax assets can be realised against future taxable profits.

1.9 Leases

The assets purchased under hire purchase agreements are included in the Fixed Assets block. The value of the asset purchased is capitalized in the books. A liability for the same amount is created at the time of entering into the agreement. The payments are made to the HP vendors as per the EMI's given in the hire purchase agreements. The finance charges are debited to the profit & loss statement and the principal amount is adjusted against the liability created for the vendor.

Lease rental in respect of operating lease arrangements are charged to expense on a straight-line basis over the term of the related lease agreement.

1.10 Borrowing Cost

Expenditure on borrowing cost on the loans obtained specifically for acquisition, construction or production of qualifying assets are capitalized as part of the cost of that asset. Other borrowing costs are charged to revenue over the tenure of the loan.

1.11 Segment Reporting

The Holding Company, Picturehouse Media Limited (formerly Telephoto Entertainments Limited) operates only in entertainment segment, whereas PVP Cinema Private Limited (formerly PVP Screens Private Limited), the subsidiary, did not have any commercial activity during the year and PVP Capital Ltd is in the media financing business and Picturehouse Media Private Limited, Singapore operates only in entertainment segment. Hence the group operations are under one segment i.e. movie and related activities.

1.12 Impairment of Assets

The Group reviews the carrying values of tangible and intangible assets for any possible impairment at each Balance Sheet date. Impairment loss, if any, is recognized in the year in which the impairment takes place.

1.13 Cash Flow Statement

The Cash Flow statement is prepared under the indirect method as per Accounting Standard 3 "Cash Flow Statements".

1.14 Earnings per Share

The earnings considered for ascertaining the Group's Earnings Per Share comprises the net profit after tax. The number of shares used in computing Basic EPS is the weighted average number of shares outstanding during the period. The number of shares used in computing diluted EPS comprises of the weighted average number of shares considered for deriving Basic EPS and also the weighted average number of equity shares that would be issued on the conversion of all dilutive potential equity shares.

1.15 Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognized when the Group has an obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Obligations are assessed on an ongoing basis and only those having a largely probable outflow of resources are provided for.

Contingent Liabilities are recognized only when there is a possible obligation arising from past events due to occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or where any present obligation cannot be measured in terms of future outflow of resources or where a reliable estimate of the obligation cannot be made.
